Performance tables for W - IEC and PAM adapter type  
Der Aufbau der Leistungstabelle für W - IEC und PAM-Adapter

IEC'li ya da PAM adaptörlü girişler için geçerli olan servis faktörü doğrudan motor montajlı redüktörler ile aynıdır. IEC ve PAM montajlı redüktörlerin servis faktörü  $f_B$  motorlu seçim sayılarından bulunabilir.

Service factor  $f_B$  could be checked from selection of geared motor tables. Because this value is the same for geared motor and geared motor with IEC-PAM adapters

Der Betriebsfaktor  $f_B$  für Antriebe mit IEC- oder PAM-Adapter ist der gleiche wie für Getriebe mit Motordirektanschluss. Den Betriebsfaktor  $f_B$  für Getriebe mit IEC- und PAM-Adapter finden Sie auf den Motorauswahltabellen.

**Tip W azami tahrik gücü hesaplanırken italik olmayan değerler alınmıştır.  $P_{1max}$  ile  $f_B = 1$**

$P_{1max}$  value which is non-italic is calculated when service factor  $f_B$  is equal to one.

Bei der Berechnung der maximalen Antriebsleistung des Typs W wurden nicht kursive Werte verwendet.  $P_{1max}$  und  $f_B = 1$

**$P_{1max}$  hesaplanırken italik olan değerlerde  $f_B > 1$  alınmıştır.**

$P_{1max}$  value which is *italic*, is calculated when service factor  $f_B$  is greater than one.

Bei der Berechnung von  $P_{1max}$  wurden für kursiv gedruckte Werte  $f_B > 1$  verwendet.
